

ZET DONAUE SAMSON

Pasig City, Philippines | zetsamson@gmail.com | +63 908 377 6146 | linkedin.com/in/zet02 | github.com/Fauxxx

PROFESSIONAL SUMMARY

Computer Engineering Technology graduate (TUP Manila) specializing in Cloud-Native Infrastructure, Container Orchestration, and GitOps CI/CD pipelines. Hands-on experience provisioning multi-environment Kubernetes (K8s) clusters using Infrastructure as Code (IaC) with Terraform and automating continuous deployment via GitHub Actions and ArgoCD. Proficient in Linux system administration (Fedora/Ubuntu), site reliability engineering (SRE) principles, and full-stack observability stacks (Prometheus, Grafana, Loki)

TECHNICAL SKILLS

- Cloud Infrastructure & IaC: DigitalOcean (DOKS, Spaces, VPC, DNS), Terraform, Helm, Infrastructure as Code (IaC).
- Container Orchestration & Linux: Kubernetes (K8s), Docker, Docker Compose, Podman, Linux (Fedora, Ubuntu), Bash Shell Scripting.
- CI/CD & GitOps: GitHub Actions, GHCR, ArgoCD, Kustomize, Automated Image Promotion, Git Version Control.
- Observability & Monitoring: Prometheus, Grafana, Loki, Grafana Alloy, Telegraf, Node Exporter, cAdvisor, InfluxDB.
- Networking & Security: Nginx Ingress Controller, Zero-Trust Network Policies, Reverse Proxy, Auth Gateways, TLS / Cert-Manager.
- Databases & Messaging: PostgreSQL, InfluxDB (Time-Series), MQTT (Eclipse Mosquitto).

KEY ENGINEERING PROJECTS

IoT-Based Fire Monitoring & Cloud-Native Analytics Platform

Lead Developer & Cloud Infrastructure Engineer Aug 2025 – June 2026

- Provisioned DigitalOcean Kubernetes (DOKS) cloud infrastructure using Terraform across 4 layered deployments (bootstrap, infra, platform, GitOps) with isolated remote state backends.
- Built a 4-stage GitHub Actions CI/CD pipeline featuring path-based change detection, parallel matrix container builds, GHCR registry publishing, and automated GitOps PR triggers.
- Implemented GitOps continuous delivery using ArgoCD to reconcile Kustomize overlays, automating dev-to-prod environment promotion via GitHub App bot credentials.
- Authored 17+ Kubernetes manifests (Deployments, StatefulSets, DaemonSets, PVCs, Ingress, Jobs) utilizing Kustomize base/overlay configurations.
- Architected a full-stack observability pipeline using Prometheus, Grafana, Loki, and Grafana Alloy, configuring 6 custom dashboards for infrastructure health and API metrics.
- Configured Kubernetes Jobs as ArgoCD PreSync hooks to execute zero-downtime database schema migrations using Flyway prior to application pod rollouts.
- Implemented Zero-Trust Kubernetes Network Policies with default-deny postures and micro-segmentation to restrict lateral container traffic.

PROFESSIONAL EXPERIENCE

InfoTouch Corporation — Makati, Metro Manila, Philippines

Software Developer – Intern | Feb 2026 – June 2026

- Refactored legacy backend web applications into high-performance C# Minimal APIs, tracing cross-stack API execution flows to maintain service availability.
- Managed Git version control workflows, executing branch management, code merges, pull requests, and peer code reviews in an agile development environment.
- Optimized database queries and route handlers using asynchronous programming (async/await) to reduce API latency.
- Authored comprehensive unit test suites and documented modernized Minimal API endpoints to ensure long-term codebase maintainability.

Concentrix — Mandaluyong, Metro Manila, Philippines

Adviser I, Sales | July 2024 – Nov 2024

- Provided cross-functional technical troubleshooting, account management, and network service resolution for telecommunications subscribers.
- Utilized multiple internal CRM systems and technical documentation databases simultaneously to diagnose and resolve complex customer issues under strict SLAs.

EDUCATION

Technological University of the Philippines (TUP) — Manila, Philippines | Bachelor of Engineering Technology major in Computer Engineering Technology | Graduation: Aug 2026
